

SPECIFICATION AMENDMENTS

Please amend the Specification as follows:

Page 110, Legend below Table 2:

-- *1: Moisture permeability (immediate) ($\text{g}/\text{m}^2/\text{d}$)

*2: Moisture permeability (after thermal shock cycle)
($\text{g}/\text{m}^2/\text{d}$)

* Softening and deformation occurred to the films 219
~~and 220~~ 206, 222 and 223 during thermal shock cycle and moisture
permeability was unsuccessful.--
